

J. Stace McGee, LEED AP+Homes, Green Rater Principal

PROFESSIONAL EXPERIENCE:

Stace is one of the principals at **edi** and **Green Insight**. As a managing partner, Stace is responsible for business operations, staff management, architectural design, construction documentation, contract administration, and LEED and sustainability consulting. Stace has been involved with many sustainable projects including fast track, retail, office buildings, banks, midrise residential, multifamily residential and cutting-edge custom residences since 1998. In his leadership capacity, Stace has educating professionals and consumers about what it means to be green. In 2008 and 2009 he was a consultant to the LEED for Homes Department of the USGBC, helping to train LEED for Homes Advocates from each chapter to work with their local Home Builders Associations and helping to create local Residential Green Building Committees to support growth in green home building.

Over the last two decades Stace has negotiated and presented many challenging green projects to numerous City Councils, Design Review Boards, Environmental Planning Commissions and Neighborhood Association across the country. Through this work and volunteer work with the USGBC he has honed his dynamic governance facilitation skills.

Stace is a dedicated ambassador for the green building movement and advocate for future generations who depend on sustainable development today.
